Choose food

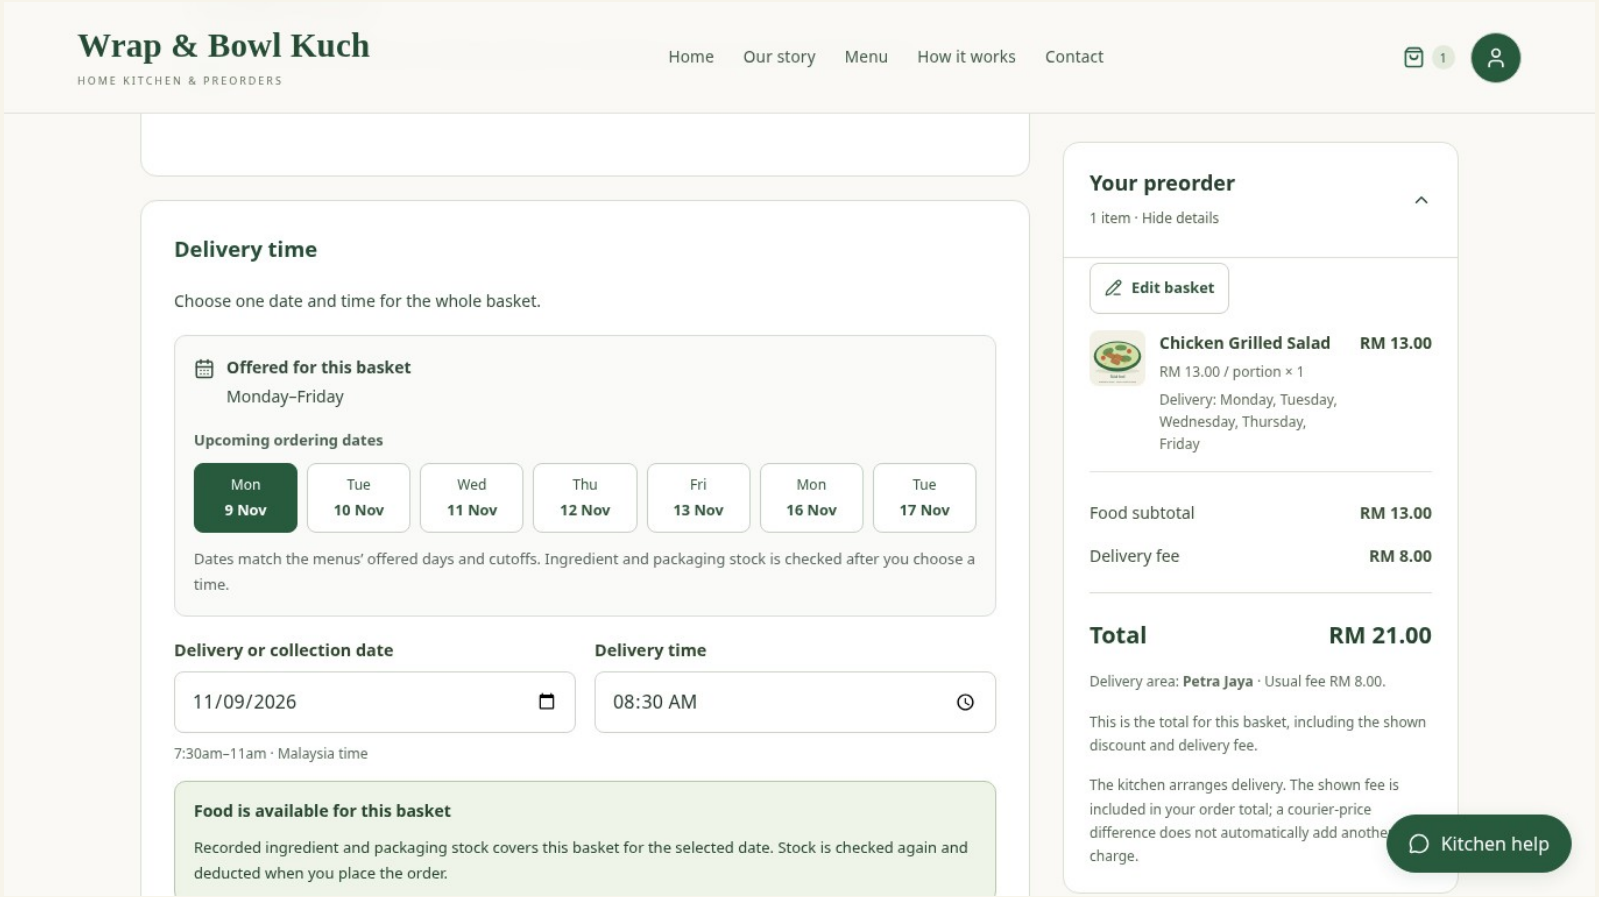

The customer browses the kitchen’s menu and selling units.

Create or access an account

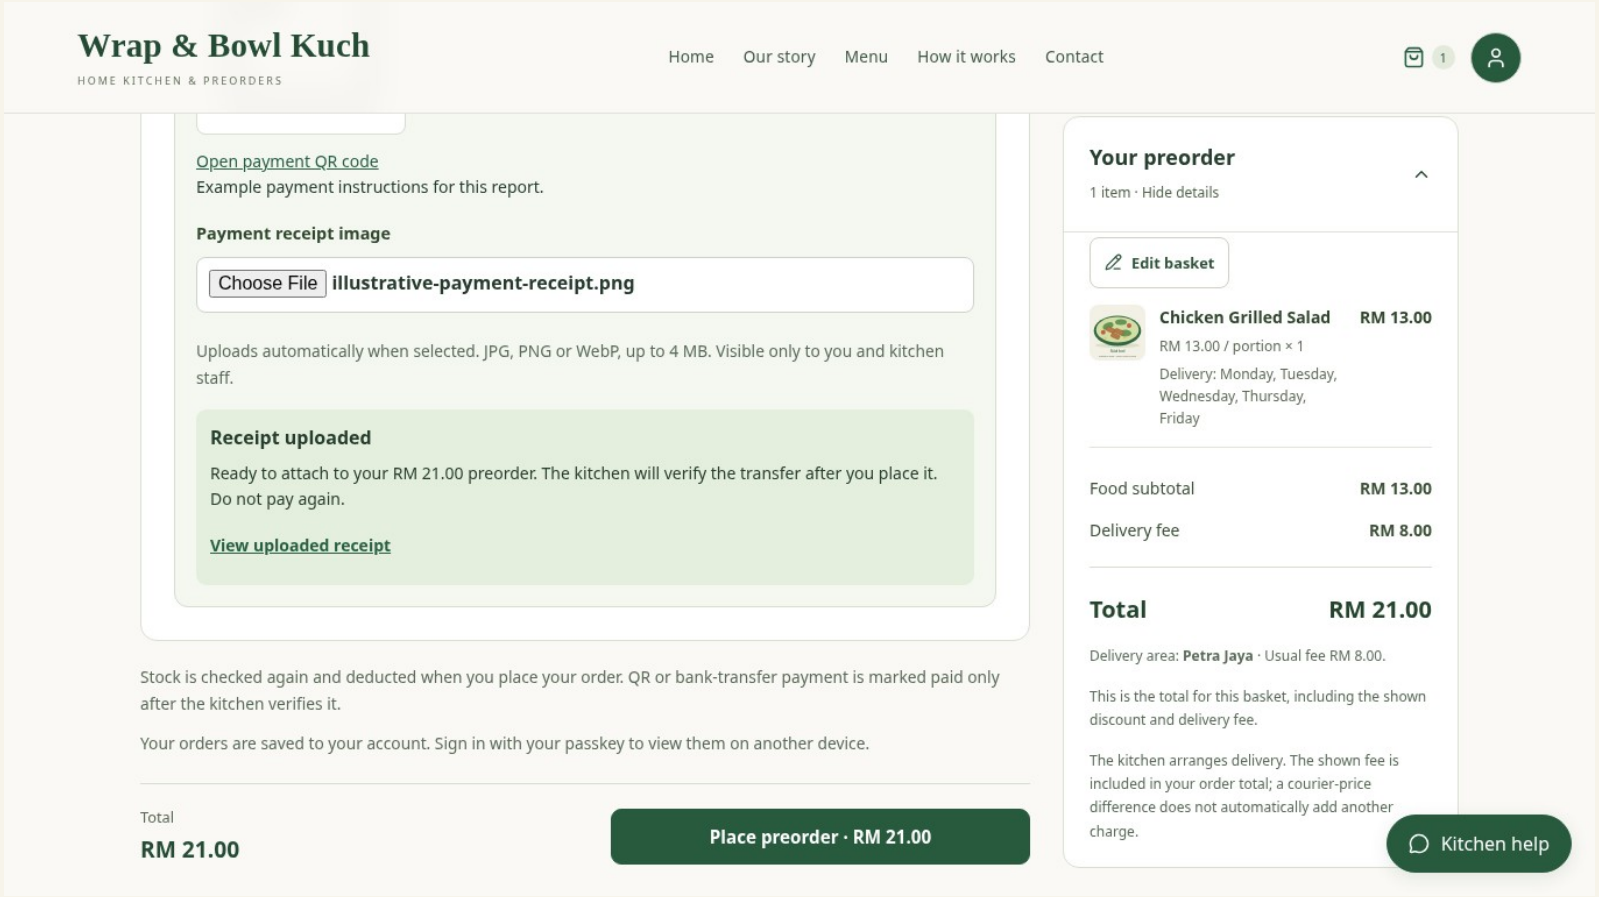

Name and phone details are supported by a saved passkey.

Choose an offered date

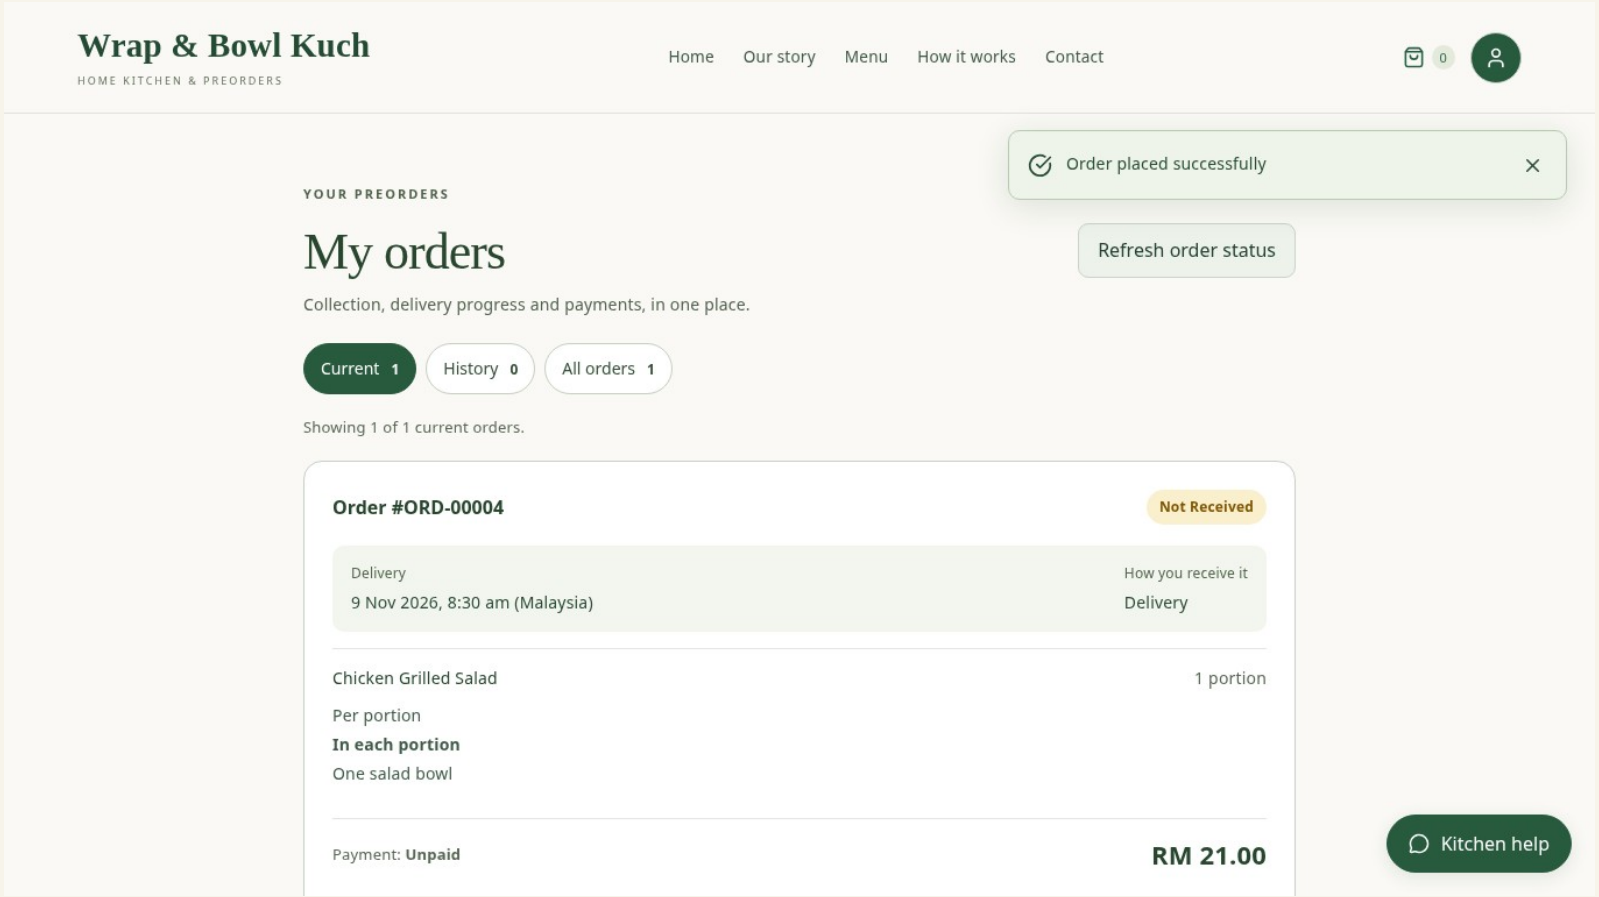

The date, time and total are checked for the actual basket.

Upload payment evidence

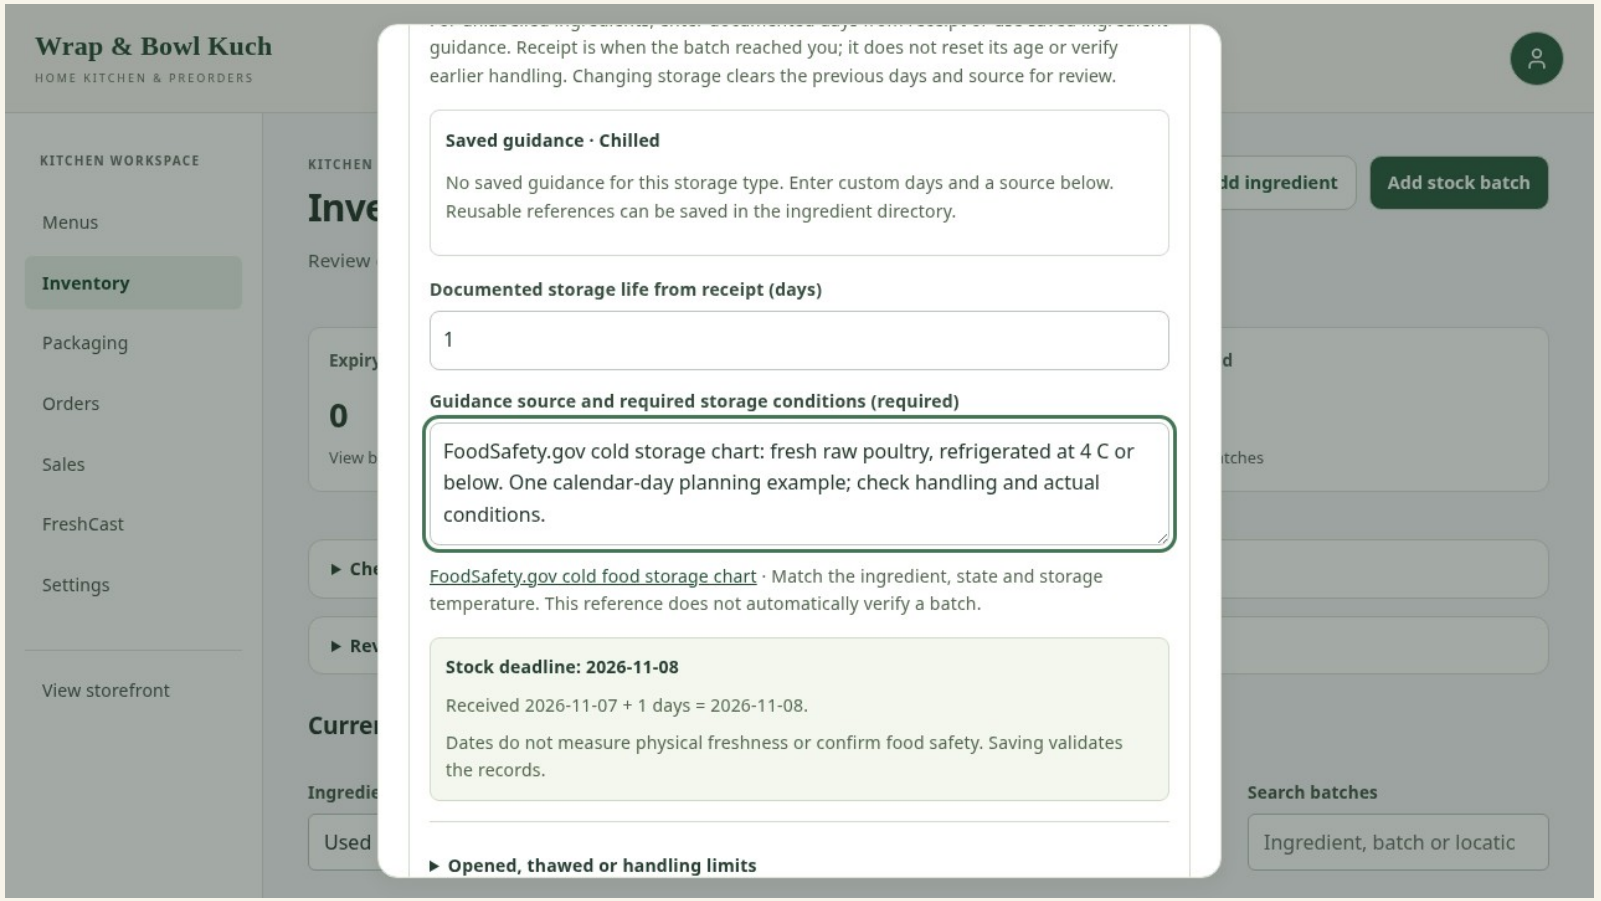

A receipt is evidence for review, not confirmed payment.

Review the accepted order

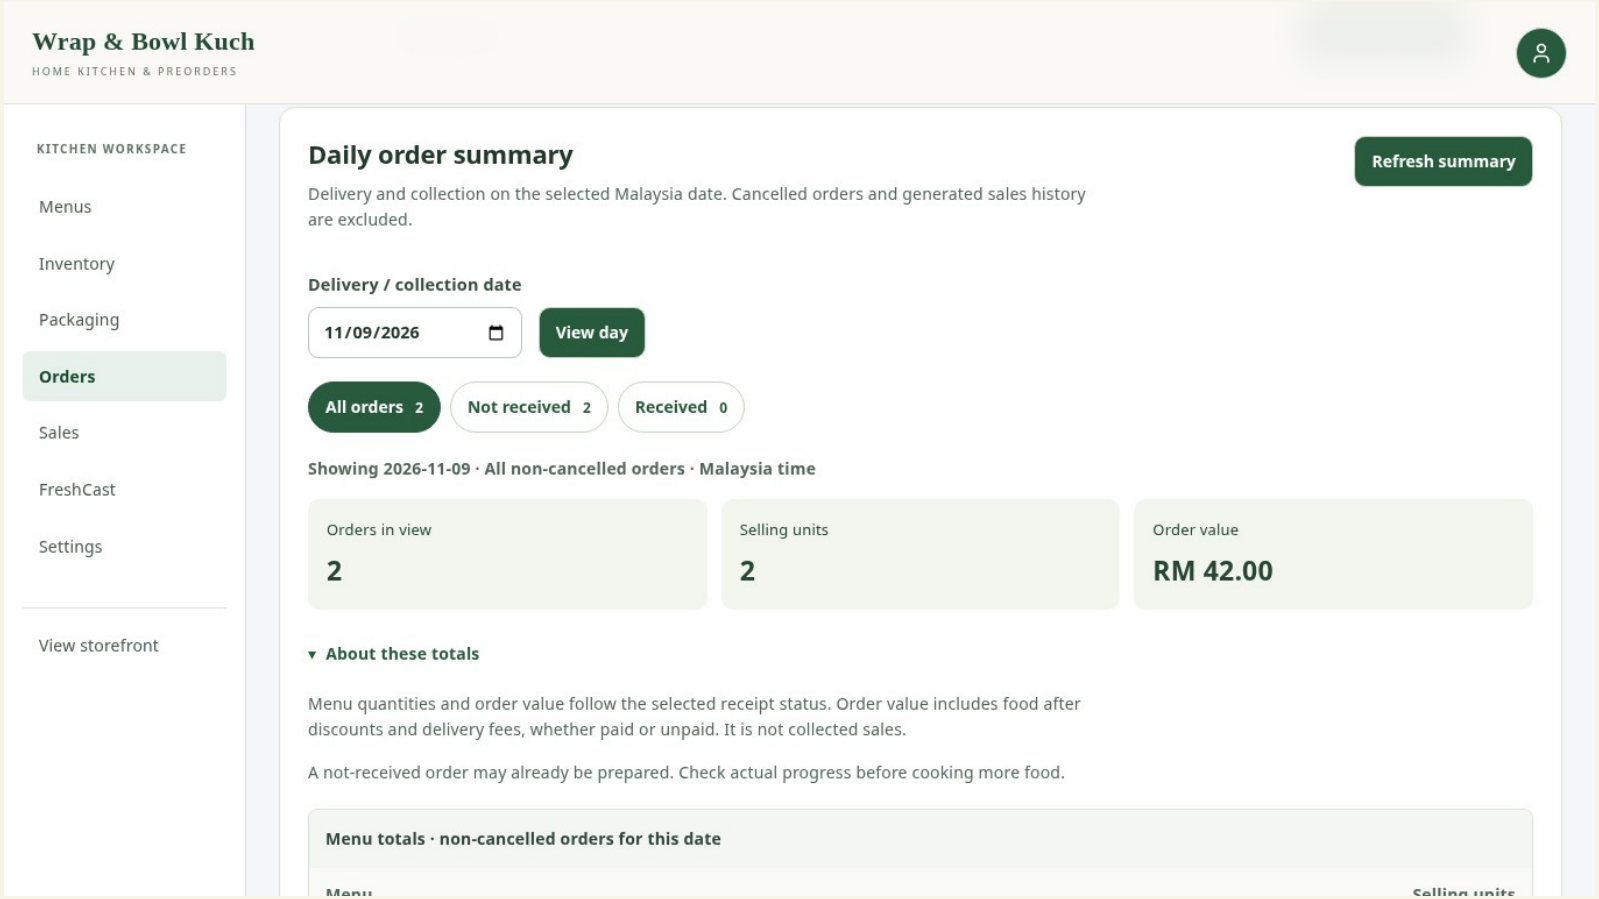

The customer sees the saved date, items and payment state.

Record batch date evidence

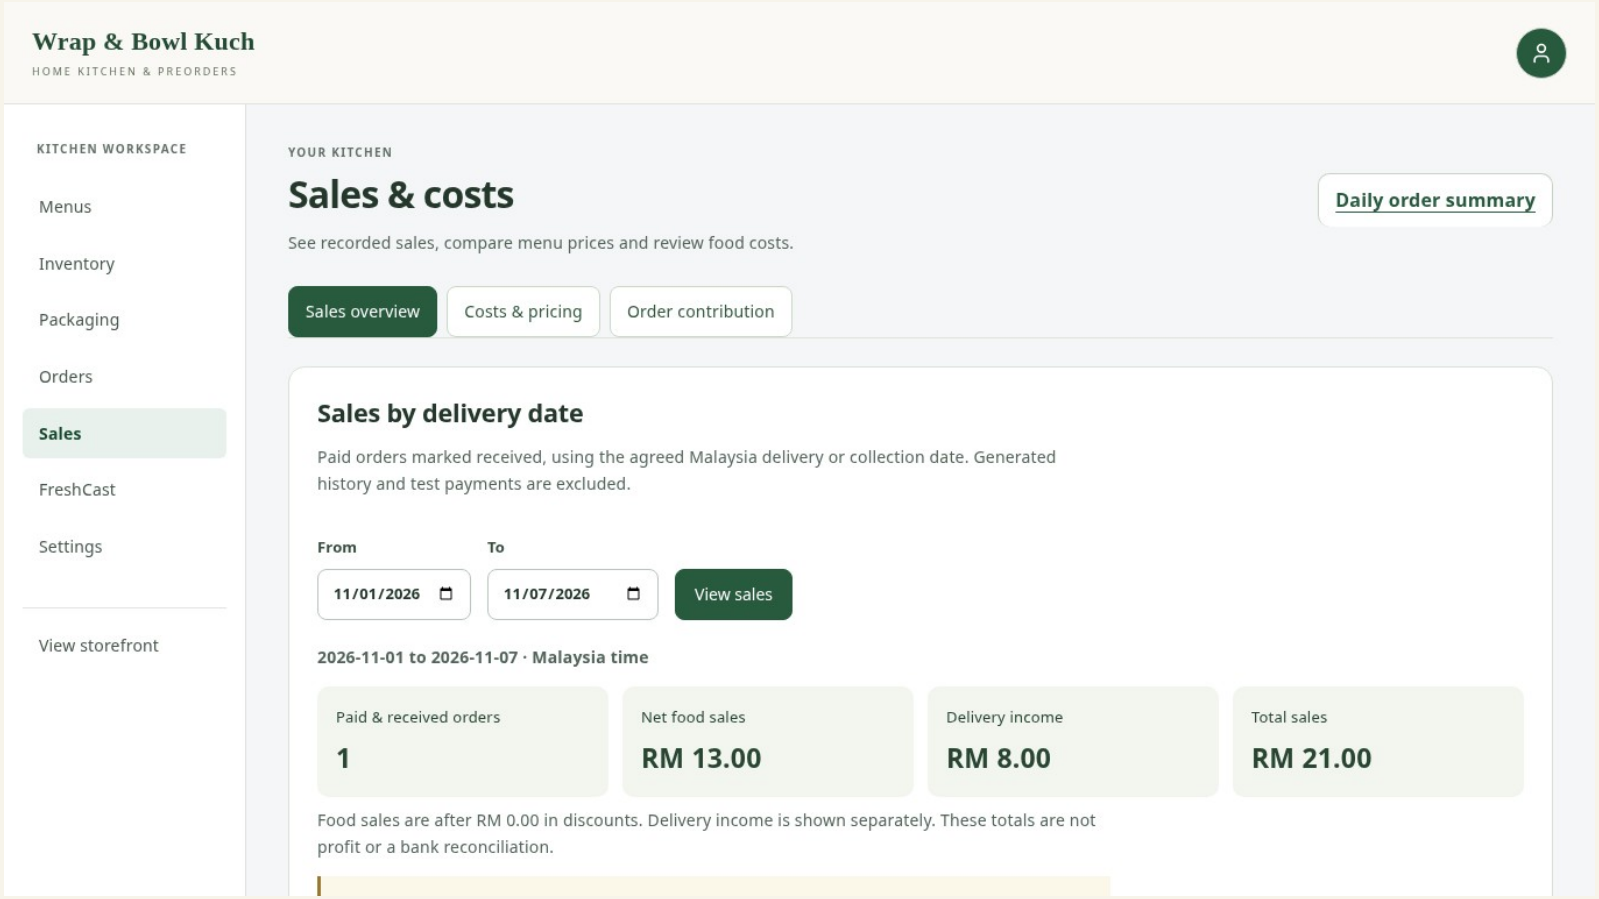

Recorded storage life, earlier limits and holds guide stock planning.

Review daily orders

The daily summary is operational order information, not collected sales.

Review sales and costs

Report totals follow their stated payment and food-receipt rules.
